### 1 The market for wired city services

Robert G. Rittenhouse

 September 1979 **ACM SIGCAS Computers and Society**, Volume 10 Issue 2

Publisher: ACM Press

Full text available: pdf(1.26 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#)

This paper attempts to develop estimates of the amount and pattern of home use that might ensue if home information/computer systems were introduced into the contemporary social system. This discussion is not intended to have technological orientation. The services described are possible, and exist, on a small scale. The problems involved in building a large system which provides multiple services are intentionally omitted. Also the effects of different regulatory climates are not explored in any ...

### 2 DeepView: a channel for distributed microscopy and informatics

B. Parvin, J. Taylor, G. Cong, M. A. OKeefe, M. H. Barcellos-Hoff

 January 1999 **Proceedings of the 1999 ACM/IEEE conference on Supercomputing (CDROM)**

Publisher: ACM Press

Full text available: pdf(2.69 MB)

 Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

### 3 An Internet-based negotiation server for e-commerce

Stanley Y.W. Su, Chunbo Huang, Joachim Hammer, Yihua Huang, Haifei Li, Liu Wang, Youzhong Liu, Charnyote Pluempitiwiriyaew, Minsoo Lee, Herman Lam

 August 2001 **The VLDB Journal – The International Journal on Very Large Data Bases**, Volume 10 Issue 1

Publisher: Springer-Verlag New York, Inc.

Full text available: pdf(355.19 KB)

 Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This paper describes the design and implementation of a replicable, Internet-based negotiation server for conducting bargaining-type negotiations between enterprises involved in e-commerce and e-business. Enterprises can be buyers and sellers of products/services or participants of a complex supply chain engaged in purchasing, planning, and scheduling. Multiple copies of our server can be installed to complement the services of Web servers. Each enterprise can install or select a trusted negotia ...

#### 4 Technical papers: software architecture I: Comparison of two component frameworks: the FIPA-compliant multi-agent system and the web-centric J2EE platform

Michelle Casagni, Margaret Lyell

May 2003 **Proceedings of the 25th International Conference on Software Engineering**

**Publisher:** IEEE Computer Society

Full text available:  pdf(1.02 MB)  Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)  
[Publisher Site](#)

This work compares and contrasts two component frameworks: (1) the web-centric Java 2 Enterprise Edition (J2EE) framework and (2) the FIPA-compliant multi-agent system (MAS). FIPA, the Foundation for Intelligent Physical Agents, provides specifications for agents and agent platforms. Both frameworks are component frameworks; servlets and Enterprise Java Beans (EJBs) in the case of J2EE and software agents in the case of MAS. Both frameworks are specification based. Both frameworks mandate platfo ...

#### 5 Enabling location-based applications

 Chatschik Bisdikian, Jim Christensen, John Davis, Maria R. Ebling, Guernsey Hunt, William Jerome, Hui Lei, Stéphane Maes, Daby Sow

July 2001 **Proceedings of the 1st international workshop on Mobile commerce**

**Publisher:** ACM Press

Full text available:  pdf(425.81 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We identify a number of factors that may hinder the commercial success of location-based applications: the concern of privacy, the need to consider context beyond location, the presence of voluminous resources, and the constrained interfaces available on mobile devices. We describe an end-to-end system architecture with integrated support to address these issues. In particular, the architecture includes a Secure Context Service that provides broad context information to applications and allow ...

#### 6 Web-based tools, systems and environments: An approach to lightweight deployment of web services

 J. Gergic, J. Kleindienst, Y. Despotopoulos, J. Soldatos, G. Patikis, A. Anagnostou, L. Polymenakos

July 2002 **Proceedings of the 14th international conference on Software engineering and knowledge engineering SEKE '02**

**Publisher:** ACM Press

Full text available:  pdf(296.74 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Web Services is gradually becoming the most popular distributed computing paradigm for the Internet. Although several vendor and research efforts are in progress, fully-fledged deployment of Web Services in a wide scale has not been accomplished yet. The present contribution describes a framework for lightweight deployment of Web Services. This framework can be seen as a contribution to a smooth transition step towards a complete large-scale deployment. The paper starts with a description of dat ...
